

## SCHOOL CENSUS

Sometime during the month of January of each year, the superintendent may take an annual census of the children of the school district, which census shall enumerate the number of children residing therein under the age of five years, the number between the ages of five and 17, and the number between the ages of 17 and 21. Such census shall also obtain information related to the planning of transportation services and such other information as the superintendent deems will be of assistance to the school district.
